RW Garage Doors, Inc.
845 Davis St, Vacaville, CA

Bay Area Builders and Architects,

We are extremely grateful to have this opportunity to serve you and your clients in choosing the perfect garage door for every unique project. With our industry leading value and personalized project management services, our goal is to establish a strong relationship based on trust, follow through and a world-class experience for both you and your clients.

We hope to become you trusted garage door company for all your personal and professional garage door needs.

To a great partnership,

Justus Angan
Marketing Manager
RW Gagare Doors, Inc.

THE RW DIFFERENCE

OUR COMMITMENT TO YOU

Front End Design Consultation

Every garage door project receives a complete design consultation to choose the perfect garage door based on style and options, while staying within the project budget. Once the design is approved a 2d AutoCAD build specifications and as-build drawing is completed to ensure a smooth build and installation process.

Pre-Installation Inspection

A pre-installation inspection of the garage will be completed to assess all necessary installation requirements have or will be met. During this visit, we complete an electrical diagram for wiring and advise on backing needed to ensure the proper material and support are installed before the scheduled installation date.

Two-Year Labor Guarantee

We take the industry standard one-year labor guarantee and double it for our customers with a complete two-year labor guarantee on all garage door installations. You can't beat that!

Special Builders & Architects Pricing

Receive special pricing on all garage doors. When purchasing our own premium handcrafted line of wood garage doors, nothing else comes close to maximizing curb appeal while immediately increasing the value of the home.

What's In It For You?

Shared Values

Holding the same CA Contractor's License since 1980, we continue to strive to meet or exceed the expectations of our customers. We know you aim to do the same. When we do right by our customers, our business wins and our customers win also.

Growing Reputation + Client Satisfaction

Your reputation and name is everything. Our goal is to be an extension of you and manage the garage door installation project so well that you can focus on all other aspects of the project. We can work directly with you or your customers to bring to life the perfect garage door.

Efficient Project Scheduling

We understand that timelines for remodels and new construction project can change in a hurry. This is why we stay flexible and schedule the installation date when you are absolutely ready. As custom and special order doors are completed and ready for install, we will send notification to make sure communication and expectations are met.

Use Direct Pricing for You, Family and Friends

Custom Project with The Scott Brothers

In the Spring of 2018, Jon and Drew Scott (Property Brother's, Dancing with the Stars, Brother vs. Brother), requested our services to build a custom wood garage door and a modern glass garage door for season 6 of their hit show "Brother vs. Brother," on HGTV.

We knew the two subject properties were going to be modernized with updated facades and landscaping, but we did not know exactly what to fully expect. After our designing and planning sessions, we chose to build Drew Scott a luxurious modern stain grade wood garage door with three vertical windows justified on the left side. Frosted glass window panes were chosen for style and security. The winner between the two brothers was Jon Scott's ultra modern rebuild in El Cerrito, CA. With an amazing front facade update (pictured below), we had our work cut out. For this unique project, we chose to install the ultra modern Amarr Horizon glass garage door with sleek horizontal lines with large oversized window panes. Again, we installed frosted glass windows for style and security. Adding these particular high end garage doors allowed the architectural design updates to stand out while dramatically increasing the curb appeal of the home.

Drew Scott had this to say:

"This is one sexy door. It's all about the curb appeal. Having a quality door like this makes your home high-end ..."
